EXPERIENCE

AGAVA Pty Ltd | Get Scaled — Automation Specialist (Remote)
Melbourne, Australia | Feb 2026 – Present

- Awarded Employee of the Quarter (Q1 2026) by company leadership, recognized for integrity, teamwork, and positive business impact — issued May 2026.
- Built and deployed 10+ automation workflows across n8n, Zapier, GoHighLevel, and Google Apps Script, saving 100+ staff-hours across 5 active client accounts.
- Automated lead capture, nurturing, and follow-up pipelines by integrating GoHighLevel CRM with third-party tools.
- Extended workflow capabilities with custom Apps Script logic where no-code tools reached their limits, while maintaining pipeline reliability through monitoring and error handling.

Freelance AI Automation Specialist
Albay, Philippines | Oct 2025 – Jan 2026

- Built an AI-powered restaurant management system automating order intake, menu validation, and business hours enforcement for a small business client.
- Deployed an automated Facebook community bot handling repetitive inquiries and logging conversations for admin review.
- Continued building personal automation projects and deepening expertise in n8n, OpenAI API, and Messenger integrations between engagements.

Liberty Music PR — AI Automation & Workflow Support (Project-Based | Remote)
Brighton, United Kingdom | Aug 2025 – Sept 2025

- Designed and deployed AI-integrated automation pipelines (Make.com, Monday.com), reducing manual data processing and reporting workload by 5–8 staff-hours weekly.
- Validated AI-generated outputs for accuracy and consistency prior to client delivery, while documenting workflow logic and edge cases for long-term maintainability.
- Identified and resolved workflow inconsistencies, improving pipeline reliability through targeted optimizations.

PROJECTS

AI-Powered Food Order Processing System

- Trigger: Manual order handling and errors from chat-based food orders
- Tools: n8n, Facebook Messenger, Telegram, OpenAI, Google Sheets, calendar-based rules
- Result: Automated order intake, enforced business hours and menu rules, reduced staff workload, and ensured accurate order records

Automated End-of-Day (EOD) CRM Reporting System

- Trigger: Manual, inconsistent compilation of end-of-day CRM activity into client-ready summary reports
- Tools: Google Apps Script, Google Sheets, Gemini AI, GoHighLevel (GHL)
- Result: Automated pipeline that uses Gemini AI to turn structured CRM data into consistently formatted HTML reports, complete with lead-priority scoring, duplicate-record handling, and KPI tracking, removing the need for manual report compilation.

Expense Tracking System with Telegram, OpenAI & Google Sheets

- Trigger: Manual and inconsistent expense logging from unstructured messages
- Tools: Make, Telegram Bot, OpenAI, Google Sheets, Gmail
- Result: Enabled natural-language expense logging, generated structured records automatically, and minimized logging errors

TECHNICAL SKILLS

- **Automation Platforms & CRM:** Make.com, n8n, Manychat, Zapier, GoHighLevel (GHL)
- **AI & LLM Systems:** ChatGPT, Claude, Gemini, Structured Outputs (JSON), Prompt Automation/Prompt Engineering
- **Programming & Scripting:** Python, JavaScript, Google Apps Script, SQL, Java
- **Project Management:** Google Workspace, Microsoft 365, Asana, Monday.com
- **Data & Reporting: Excel, Google Sheets, Tableau, Power BI**
- **Integrations:** Webhooks (incl. verification handshakes), Polling, OAuth 2.0, API Key Authentication, Basic Auth

CORE COMPETENCIES

Client-Facing Communication • Cross-Functional Collaboration • Requirements Discovery & Solution Scoping • Independent Project Ownership • Adaptability Across Tools & Platforms • Multi-Client / Multi-Project Delivery

EDUCATION

Bicol University Polangui
Bachelor of Science in Information Technology | GPA: 3.7
